

Environment and quality policy

TOTAL MARITIME SOLUTIONS is a company that offers to the customers technological solutions in the field of IOT and communication systems adapted to the needs of the maritime sector. Our mission is to offer the most competitive solutions with high added value for the customer.

To reinforce this commitment, we have implemented an Integrated Quality Management System according to ISO 9001: 2015 and Environmental Management according to ISO 14001: 2015. The Management team assumes leadership in the implementation of the quality and environmental system based on the following principles:

- Our effort is focused on listening to our clients, being proactive and flexible, offering proposals adapted to their needs, sustainable and with high value.
- Our team must coordinate and work hand in hand with our clients in order to achieve a common goal, a job well done.
- We must maintain a permanent focus on excellence in management, initiative, innovation, and efficiency.
- Continuously improve our processes and our environmental performance, prevent pollution, reduce and eliminate waste through reduction and recycling, minimize the environmental impact of our services, apply and maintain technology that efficiently uses and saves energy and natural resources.
- All of us who are part of this company and our collaborators must be focused on achieving customer and regulatory requirements, sustainability, and maintaining transparent communication channels with customers, the environment, and stakeholders.

The Management provides the necessary resources to achieve these objectives, and will periodically review the convenience, adequacy and effectiveness of the Integrated Quality and Environmental Management System. The full participation of all of us who make up this company is essential, and we ask everyone to fully commit to this Quality and Environmental Policy.
